

Doing your bit for the environment whilst DRIVING

Consider having your car converted to LPG.

Smaller cars are more economical for town runs – buy smaller cars.

Use your car for longer journeys – but walk, cycle or use public transport for shorter journeys.

Car share – share lifts to and from work with colleagues.

Have consideration on the road for others when driving.

Buy new cars, which are more fuel-efficient.

If you have an older car – have it serviced regularly – look after it.
