

## LTP2 SEA Monitoring Table

Objective and SEA Topic	Indicator	Baseline	2006/7	2007/8	2008/9	2009/10	2010/11
① Contain/reduce air pollution to levels that do not damage the natural system.  AIR	Number of Air Quality Management Areas	0					
② Minimise the emission of greenhouse gases.  CLIMATIC FACTORS	% of road-side sites meeting air quality regulations for nitrogen dioxide	100% (18 out of 18)					
③ Improve the health and well-being of the population and to reduce inequalities in health.  POPULATION AND HUMAN HEALTH	% of all households within 60 minutes travel time to a hospital by public transport.	99.8%					
	% of all households within 30 minutes travel time to a hospital by public transport.	74.7%					
	% of households without a car within 60 minutes travel time to a hospital by public transport.	99.9%					
	% of households without a car within 30 minutes travel time to a hospital by public transport.	86%					

	% of all households within 30 minutes travel time to a GP surgery by public transport.	99.8%					
	% of all households within 15 minutes travel time to a GP surgery by public transport.	96.6%					
	% of households without a car within 30 minutes travel time to a GP surgery by public transport.	99.9%					
	% of households without a car within 15 minutes travel time to a GP surgery by public transport.	98.9%					
④ Reduce poverty and social exclusion, and close the gap between the most disadvantaged communities.  POPULATION AND HUMAN HEALTH	% of all households within 30 minutes travel time of a major centre by public transport.	99.5%					
	% of all households within 15 minutes travel time of a major centre by public transport.	95.4%					
	% of households without a car within 30 minutes travel time of a major centre by public transport.	99.8%					
	% of households without a car within 15 minutes travel time of a major centre by public transport.	98.5%					
⑤ Reduce crime and	BV127b Violent offences committed in public places	2003/4 data: 7.8					

fear of crime.  POPULATION AND HUMAN HEALTH	committed in public places per 1,000 population.						
⑥ Promote opportunities for recreation, art, culture and heritage.  POPULATION AND HUMAN HEALTH	Area of public and private open space lost since implementation of LTP2.	base-line: 0					
	BV117 The number of physical visits per 1000 population to public library premises.	2003/4 data: 5,738 2004/5 data: 6,054					
⑦ Reduce the number of people annoyed by noise.  POPULATION AND HUMAN HEALTH	The percentage of people who feel noise from transport is a problem in their area.	34%					
⑧ Protect and enhance biodiversity.  BIODIVERSITY, FLORA, FAUNA AND SOIL	The Government has a Public Service Agreement that a target of 95% of SSSI land is to be deemed 'favourable' or in 'recovering' condition by 2010.	1. Coate Water 'recovering' 25.7% 2. Burderop Wood 'unfavourable no change' 100% 3. Old Town Railway cutting					

		'favourable' 100%					
		4. Okus Quarry 'recovering' 100%					
		5. Great Quarry "favourable" 39.13%					
⑨ Protect and enhance the historic and archaeological environment.  CULTURAL HERITAGE	Number of listed buildings or listed features lost through development since implementation of LTP2	base-line: 0					
	Number of archaeological remains lost through development since implementation of LTP2	base-line: 0					
⑩ Promote and enhance a high quality built environment.  LANDSCAPE AND TOWNSCAPE	BVPI 89 The percentage of people satisfied with the cleanliness standard in their area.	2003/4 data: 17%					
⑪ Promote vitality of the town centre.  MATERIAL ASSETS	Negotiate new Bus Station as part of town centre redevelopment.	n/a					
⑫ Encourage urban regeneration through promotion of the Swindon Principal	The percentage roads with less than a year of life: BV 96, 97a, 97b, 187 (footway)	<u>2004/5:</u> <u>2010/2011</u> 20.1%      13% 3.7%					

Urban Area.		10.5%					
MATERIAL ASSETS		13.8%	15%				
		25.1%	18%				
⑬ Contain/reduce water and lands pollution to levels that do not damage the natural environment.	Chemical water quality: % grade B or above	2005 – 24.6%					
WATER AND SOIL							
	Biological water quality: % grade B or above	2005 – 52.9%
