26/00184/OTHBN	30 Grove OrchardHighworthSwindonSN6 7LB	The proposal involves the conversion of an existing integral garage into habitable living accommodation with an ensuite bathroom. The dwelling will remain a single-family residence, and there is no change to the overall use of the property.The existing garage doors will be removed and the opening will be bricked up using materials to match the existing dwelling in colour, texture, and finish. A new window will be installed within the front elevation, designed to match the style, proportions, and appearance of the existing windows to ensure the development integrates seamlessly with the property frontage. The proposed brickwork and window will match the existing dwelling in materials, colour, and style.Although referred to as a garage, the space is not suitable for vehicular use due to a 6inch step between the external ground level and the internal floor level. The internal floor will be raised to align with the main dwelling floor level to create a continuous transition between spaces.All external walls and the floor will be insulated to meet current Building Regulations requirements for thermal efficiency. The development will comply with all relevant Building Regulations, including insulation, ventilation, fire safety, and structural requirements.Part of the converted space will accommodate an ensuite bathroom. A new soil pipe will be installed to serve the ensuite and will connect to the existing sewer system. This connection will incorporate the existing kitchen waste pipe connections. No alterations to the existing surface water drainage are proposed.An internal doorway will be formed through the existing hallway wall to provide direct access to the new living space.There are no alterations to the roof, footprint, or overall scale of the property. There will be no change to the existing off-street parking provision, and parking will continue to be available on the driveway.The development will not result in overlooking, overshadowing, loss of p...		04-Nov-26
