

## NEV Consultation and Information Event Feedback

### A420 Corridor

- 1. A number of people suggested that the A420 should be upgraded to dual carriageway standard.**

*The scope of the NEV programme is to accommodate the NEV transport demand. The package of presented highway schemes is designed to mitigate the impact of development demand on the A420 and improve junctions so that they operate more efficiently.*

*The issues on the wider A420 corridor are being discussed with Oxfordshire County Council in the context of other development proposals that are currently being progressed, and both Councils have committed to undertaking a joint A420 Corridor Study. There are a number of limitations to widening the full corridor and insufficient evidence to require NEV developers to improve the A420 to this extent. Consequently, whilst the full corridor will remain a Swindon Borough Council/Oxfordshire County Council consideration, the NEV programme will continue to address the necessary improvements on the local section of the road in the short to medium term.*
