Appendix 4

Pitch and Ancillary Facilities' Quality Ratings

Introduction

Quality ratings for pitches are based on undertaking a site visit to record visual observations relating to indicators of quality. The set of questions answered and observations made are based on forms which have been agreed by NGBs and Sport England and which accompany the PPS guidance produced by Sport England. These are reproduced in this appendix.

When an initial score has been ascertained following site visits, these are moderated and “grounded” by other data received (such as club surveys received) and through discussion with NGBs and the local authority (to ensure that a representative quality rating is given which applies across a season). “Sign-off” of the final quality ratings is required by the process and the consultant prior to the data being used to identify the appropriate capacity (in terms of match equivalents) for each pitch.

For rugby pitches, a maintenance and drainage score is also the result of this process.
