**Re Planning Inspectorate ROW/3209564: Footpath 44 Modification Order Wanborough
– Interim Decision 29th November 2019**

We have lived at Moat Cottage since 1995 and as per our original statements we have used the footpaths in questions on many occasions since and even before this date as Tanya's family owned the property for 40 years prior to us.

We wish to acknowledge your acceptance of the claim for section G-D-E-F on the order map as this is the path that we have always walked. However, we cannot agree with the Inspectors decision to remove the section A-C on the order map.

When we walked this section of the path and entered from Wrightsbridge end, there was a gate that was often closed but there was a gap between it and the hedge to walk through. There used to be an old stile but when it got too old and removed, we used the gap. When we walked the path we generally kept the high wire fence (see attached picture) to our left on our way to Burycroft and on our right on our return.

The route we walked is very close to A-C on the order and would ask you to reconsider your decision.

Steve and Tanya Savage
